Hey guys, which building for the tute class later?

s3613240 2017-03-21 17:10:07
It's in building 56

s3613240 2017-03-21 17:10:57
56.07.95

s3613979-lip 2017-03-21 17:26:34
Alright see you guys later ;)

s3613240 2017-03-21 17:29:34
I'm grabbing something to eat guys, could be 5 mins late

s3613240 2017-03-21 17:29:35
:3

s3613240 2017-03-21 17:50:43
Are you guys there

s3613240 2017-03-21 17:50:49
I'm in front of the building

s3613240 2017-03-21 17:50:53
:|

s3613979-lip 2017-03-21 17:51:05
Yea im in the class now

Every weekday

s3613240 2017-03-23 00:54:39

We can do Sprint Planning on Tuesday at the tutorial

s3613240 2017-03-23 00:55:30

Also, everyone please create Github accounts and send me your usernames

dilanifernando 2017-03-24 02:05:47

My username is Dilani112

s3613240 2017-03-26 16:48:45

I've sent invites to join the Github repo to @dilanifernando and @s3613979-lip

s3613240 2017-03-26 16:49:04

@jakewestrip Can you send me your username too?

jakewestrip 2017-03-27 02:50:45

Hi, sorry, I was away for the weekend.

My GitHub username is rmit-s3559660-jake-westrip

s3613240 2017-03-27 08:17:45

Okay. I will add you to the repo within the day

s3613240 2017-03-27 09:17:26

@jakewestrip you should get an invite now

s3613240 2017-03-27 09:19:48

@dilanifernando nice work with the class diagram. I'll have a proper look at it tonight, but just a note, class diagrams don't have Primary Keys. You have one in your user class

dilanifernando 2017-03-27 13:41:45

Yes for the time being , I just included everything to get a clear picture .. we can reverse engineer it later on

s3613979-lip 2017-03-27 14:57:29

Are you guys free before 4:30?

s3613979-lip 2017-03-27 14:58:19

I might not goin sepm lecture class later, i'll join you guys

s3613240 2017-03-27 15:18:51

I'm working on an assignment due tonight. Artificial intelligence

s3613240 2017-03-27 15:18:59

Might not come in for the lecture

s3613240 2017-03-27 15:19:47

@dilanifernando can you write some more user stories as per

the Assignment spec?

Channels

#documentation
#general
#github-notifications
#random
#reading
#standups

s3613240 2017-03-27 15:19:59

I'll add the stuff into trello

s3613240 2017-03-27 15:20:07

Also, are we set on Java?

s3613240 2017-03-27 15:20:18

If so, I'd like to start coding the classes

dilanifernando 2017-03-27 16:00:17

Ok I can write some user stories .. I will upload them to Trello .. we can review it tomorrow

s3613240 2017-03-27 16:00:44

Sure

s3613979-lip 2017-03-27 16:04:27

So we're not going to use node.js?

s3613240 2017-03-27 16:05:08

I think we agreed that we should use a language that everyone understands

dilanifernando 2017-03-27 16:06:11

Apart from that I designed some layouts for the login panel and the registration panel java swing based ..

s3613240 2017-03-27 16:06:40

Wow dilani's been busy

dilanifernando 2017-03-27 16:08:41

Anyway it's up to you guys, I thought you guys already finalised it ..

s3613979-lip 2017-03-27 16:11:35

Alright then :skin-tone-2: :skin-tone-2: im okay with that

s3613240 2017-03-27 16:23:54

Okay then it's settled. We are gonna use Java. We can decide later if it's gonna be a standalone app or a web based one. Like @jakewestrip mentioned the other day, we can have a console interface until we've gotten all the functionality setup and go from there

s3613240 2017-03-27 16:25:15

Then if we have enough time to debug all the issues with a Java web app, we'll go with web since it's easy to make it look great. If we don't have enough time, we'll make a simple swing based UI that won't look as great

Channels

dilanifernando 2017-03-28 08:00:49

By the time I saw this msg , I have done some coding .. is that ok if I upload it to GitHub?

s3613240 2017-03-28 08:01:23

Sure. Go ahead. Make sure to open a new branch before pushing your code

s3613240 2017-03-28 08:01:46

We'll go through a bit of a code review process before merging it to the master branch

dilanifernando 2017-03-28 08:02:48

s3613240 2017-03-28 08:05:50

Also, can we meet up for 15 minutes before the tute? We need to setup a protocol to follow when pushing and getting our code approved by the rest of the team

dilanifernando 2017-03-28 08:05:58

I updated the class diagram too .. it's on trello

dilanifernando 2017-03-28 09:05:34

My other tute class finishes at 5.30 .. I don't know whether I can get off early .. you guys do the setup and update me when I come to the class ..

s3613240 2017-03-28 09:24:35

Oh okay. Can you push the code you've written then?

s3613240 2017-03-28 09:25:11

I'm gonna write a test console interface for us to demonstrate

dilanifernando 2017-03-28 10:01:32

I was doing some editing .. it's on GitHub

dilanifernando 2017-03-28 11:09:14

Did you check it out? Let me know of your ideas

dilanifernando 2017-03-28 12:33:48

@s3613240 should I bring my laptop? We can use urs for the demo

s3613240 2017-03-28 16:43:42

I checked out your code. It looks like we'll have to decide on an IDE to use for Development.

s3613240 2017-03-28 16:44:41

Different Java IDEs setup swing projects differently, so I can't seem to edit anything on the UI without diving into the actual

code which will make things much harder and time consuming

Channels

dilanifernando 2017-03-28 17:42:20

New user story is on Trello .. I could come up with one only ..

dilanifernando 2017-03-28 17:42:29

I used netbeans

jakewestrip 2017-03-28 17:42:58

Sorry I'm late guys, will be there in like 15 mins

dilanifernando 2017-03-28 17:43:28

Me too .. I'm on the way

s3613240 2017-03-29 08:20:44

Guys, I was thinking about how we could divide up Models and controllers, and came up with a solution that we can discuss. What if we build the models like the class diagram we already have and divide up the controllers by different **module** in the system? Like one controller for the Authentication Module?

s3613240 2017-03-29 08:20:54

Let me know what you think?

jakewestrip 2017-03-29 19:01:11

I think that's probably a good way forward at this point. We should start to think about our basic GUI layout and screens, and Controllers should be split up according to that. (ie. 1 controller per viewModel)

s3613240 2017-03-30 14:24:06

Guys, I changed the permission model on the master branch to make sure any of us doesn't accidentally push untested code to it. The changes can be merged once a formal review is done.

s3613240 2017-03-30 16:24:14

@dilanifernando @s3613979-lip guys, how are things going on your end? Were you able to write up an implementation for your classes yet?

s3613979-lip 2017-03-30 17:07:58

I'll continue work on it tonight. Im still in the class

s3613240 2017-03-30 17:08:07

Cool

dilanifernando 2017-03-30 22:44:51

I'm also making progress with my work .. trying to push the code by Saturday .. junit is kinda confusing .. do we have to write another code to test this code? That's more work

dilanifernando 2017-03-31 00:36:52
Guys,

dilanifernando 2017-03-31 00:54:22
So are we following the MVC architecture?

s3613240 2017-03-31 08:50:36
No, you don't have to test the tests, but you have to make sure that the tests fail when they should

s3613240 2017-03-31 08:50:52
We have to use MVC architecture, it's one of the requirements

s3613240 2017-03-31 11:37:57
@jakewestrip Please let us know about the progress on the Database Handler?

dilanifernando 2017-03-31 11:57:13
Well, I read the specs I didn't quite catch that .. but if you guys think it's the best way to do it .. I'm fine with that .. guys let's keep everything simple , we don't have much time left .. it takes more time than we expect once we try to do it .. any of you guys done some coding please push it ..

s3613240 2017-03-31 11:58:04
It was one of the requirements that our tutor gave us. According to him, we are not supposed to do the assignment just as specified on the Assignment spec

s3613240 2017-03-31 11:58:33
He will change his mind and ask us to do changes when we show him a demo on Tuesday

s3613240 2017-03-31 11:58:40
So be ready to change anything

dilanifernando 2017-03-31 12:01:22
My apologies , I didn't know that .. I was late for the class .. as I mentioned earlier , I'm 100% with this and do my best !!

s3613240 2017-03-31 12:02:34
Cool. Please remember to open a pull request and we will check if the code is written according to MVC spec in review. Just to make sure everyone's writing consistent code

dilanifernando 2017-03-31 12:02:54

s3613240 2017-03-31 12:03:25
Guys, it's also good if you can push the code by Saturday. It takes a while to do a proper review and integration tests

Channels

s3613979-lip 2017-03-31 15:33:02

hey guys, the ui i need to create, is it involved the customer, user, employee , etc? Correct me if I'm wrong.

s3613240 2017-03-31 15:34:14

The business registration isn't included in the project at this stage.

s3613240 2017-03-31 15:34:25

But there should be a way for the business to login

s3613240 2017-03-31 15:35:19

or employees for that matter

s3613240 2017-03-31 15:35:32

We only have to have the customer registration and login

s3613240 2017-03-31 15:35:49

Others will be added using config files at this point

s3613240 2017-04-01 10:53:16

Guys, I've added a .gitignore file to the master branch. Please merge your local master branch with the remote master to include it in your existing work. You can do this by running the following commands.

```
git checkout master
```

```
git fetch
```

```
git checkout <your_branch>
```

```
git rebase master
```

s3613240 2017-04-01 10:54:36

Also, I'll be at uni working on the assignments and studying if anyone wants to come do some peer programming

s3613240 2017-04-01 12:09:38

Hey guys, can we add the backlog items we are working on to Trello?

s3613240 2017-04-01 16:15:30

Guys, I've added Gradle as a build tool to the repo. And I've stubbed out a project structure (added src and tests folders).

s3613240 2017-04-01 16:15:44

You can merge it into the working directory and keep working

Channels

#documentation
#general
#github-notifications
#random
#reading
#standups

s3613240 2017-04-01 22:01:39

Guys make sure you don't create branches from any other branch other than master

s3613240 2017-04-01 22:02:00

Will make your code have weird dependencies which will be hard to debug

dilanifernando 2017-04-02 17:07:08

Hey guys, pls push the code you've written ..

s3613240 2017-04-02 17:27:43

I noticed that there are changes to be done in the class diagram. Also, the controller classes and Model classes should be separated too. Can you get on that @dilanifernando ? Or post a link to the editable version.

s3613979-lip 2017-04-02 17:30:15

are we going to have email address for the customer registration? How are we going to search for the customer? by using id??

s3613240 2017-04-02 17:31:01

I feel like email addresses are a better way to go since it'll make the code so much easier than having to generate user ids

s3613240 2017-04-02 21:33:36

It seems like we'll have to do some cleaning up after everyone pushes their code to make sure it's in the same structure. So, please push your code as soon as possible. @jakewestrip we need that Database Handler asap please

dilanifernando 2017-04-02 22:10:30

@s3613240 posted the editable version on the Trello

dilanifernando 2017-04-02 22:21:28

@jakewestrip we need the database handler asap please

dilanifernando 2017-04-03 02:48:29

@s3613240 @s3613979-lip we can forget about the Id, but using email address for searching would be complicated than we think .. why can't we use username ?? Username is unique anyway

s3613979-lip 2017-04-03 02:52:38

Yeah, but email address is unique too. Maybe we could use either username or email address? we need to declare that the username as unique or else there would be error if the username is repeated

Channels

#documentation
 #general
 #github-notifications
 #random
 #reading
 #standups

s3613979-lip 2017-04-03 02:55:30

It's much easier if we use email, cuz for the forgot password part, we probably using email to reset password right? username sounds a bit weird haha

s3613240 2017-04-03 09:23:52

@s3613979-lip I couldn't test the code you've written yet, but it looks like you've made a GUI, which will take a long time to complete. Can you change it to a command line app so we can have a demo by tomorrow? It shouldn't take too long to do that. Meet me today if you need any help with it

s3613240 2017-04-03 09:24:26

Also guys, don't forget to update Trello whenever you take up a task and complete it.

s3613979-lip 2017-04-03 11:40:57

Alright i'll see you later

s3613240 2017-04-03 17:03:51

Guys, can we follow this project structure? I've updated the Gradle build to use this structure

```
src/
  <package>/
    <java_files>
tests/
  unit/
    <package>/
      <java_files>
gradle/
  <gradle wrapper>
build.gradle
settings.gradle
```

s3613240 2017-04-03 17:05:56

We can have Gradle run all our tests everytime we code something new if we use this structure

dilanifernando 2017-04-03 18:50:13

@jakewestrip I think we need to add two more attributes to the booking model... to store the usernames of personFor and personMade .. do you think it's necessary? If so could you

please add for me ? Thanks !!

dilanifernando 2017-04-03 19:07:05

I will modify it myself .. I will let you know the changes tommorow ..

s3613240 2017-04-03 19:19:31

@dilanifernando Can you send me a link to the Lucid Charts diagram? I have some changes for the class diagram

dilanifernando 2017-04-03 19:29:47

It's on Trello

s3613240 2017-04-03 19:35:34

Cool

dilanifernando 2017-04-04 00:19:09

There are problems with booking date /time handling .. there are a lot of formatting, validations to do too ..I don't know whether it's easier to change the db .. if you guys can , pls help with this ..

dilanifernando 2017-04-04 06:09:15

Hi guys , I pushed the code what I have done so far , I think we need to do some changes in the database and also in the database handler .. just for the time being I removed email field from the booking form , because it doesn't exists in the database .. about booking time implementation, we need to discuss little bit more

s3613240 2017-04-04 17:52:30

Guys, are you on your way to the tute? We have a test today

s3613240 2017-04-06 12:09:10

@jakewestrip Hey jake, Can you message me on Slack tonight? Need to go over some things about the db module

jakewestrip 2017-04-06 12:10:25

Yeah sure. Sorry I didn't show up to the tute guys, I've been sick all week.

s3613240 2017-04-06 12:11:32

No worries man. We have some incompatibilities among the modules. You reckon you can do some changes in fbFunctionality? Or shall I have a go at it?

jakewestrip 2017-04-06 12:20:54

I'll be able to make changes tonight

s3613240 2017-04-08 14:18:57

Guys, our qithub repo appears to be broken somehow. I can't

Channels

#standups

seem to fetch anything from anyone else's branches

s3613240 2017-04-08 17:03:52

Guys, let me know if your modules are ready to go

s3613240 2017-04-08 17:04:16

@jakewestrip can you checkout the PRs assigned to you?

dilanifernando 2017-04-09 20:13:05

For my testing purposes I used views .. so I have codes in the views too .. pls get rid of those when integrating

dilanifernando 2017-04-10 05:49:45

Uploaded employee functionalities on GitHub ..

s3613240 2017-04-10 09:17:00

Submitted

s3613240 2017-04-10 09:17:14

@dilanifernando Jake did the updates to the class diagram. Get some sleep

dilanifernando 2017-04-10 09:18:50

Thank you guys

dilanifernando 2017-04-10 09:20:46

See you before the lecture

s3613240 2017-04-10 09:20:52

See ya

s3613240 2017-04-10 09:27:18

All done

s3613240 2017-04-11 17:41:17

Guys?

s3613979-lip 2017-04-11 17:41:46

Im comin right now

s3613240 2017-04-11 17:41:54

Cool

s3613240 2017-04-11 17:42:02

We have the demo today

s3613979-lip 2017-04-11 17:42:10

<@U4LGD8TEFIs3613979-lip> uploaded a file:

s3613979-lip 2017-04-11 17:42:12

Hey guys, tmr is the public holiday. So, when's our next meeting?

s3613240 2017-04-24 09:29:42

We can meet on Wednesday or even today. Are you guys free before the lecture?

s3613979-lip 2017-04-24 09:30:59

Nah, i have class before that. I can make it on Wed.

s3613240 2017-04-24 09:33:38

Guys, I've tagged Part A of the Assignment as specified in the spec

s3613240 2017-04-24 09:37:40

We have to implement a GUI this time around. Since we need the WOW factor to impress Mohammad since the first demo didn't go so well, I believe we have to have a kickass GUI. So, if @jakewestrip can coordinate with you guys to make the backend code stable and implement the additional functionality in java (since he has a more complete knowledge of how the data fits in the database) I can develop a Web Frontend with an awesome design. I propose we go with a web UI since the swing UI doesn't really look good without too much work.

s3613240 2017-04-24 14:50:08

I've added issues in Github and Trello for the bugs that we have to fix going into part B

s3613240 2017-04-24 14:53:27

I suggest we extend our current app into a REST API. I will try to come up with a specification and include a link to it here. I've added a guide as to how we can do this in <#C53CYCYH3lreading>

s3613979-lip 2017-04-24 16:35:06

We do have replacement class for tute today right?

s3613240 2017-04-24 17:04:43

Our tute isn't today right? It's on Thiesday

s3613240 2017-04-24 17:05:12

Thursday

s3613979-lip 2017-04-24 17:07:07

Lawrence just mentioned it that there's no marks given for this week tute so it's alright for not attending any tute. However, we still need to meet up for the part b, so we make it on wed?

Yeah. Let's meet up on Wednesday. I'll have the required functions stubbed for us to fill in.

dilanifernando 2017-04-25 19:27:32
@s3613240 are we going to save email address under username field in the database Or should we have a seperate field for that?

s3613240 2017-04-25 19:27:59
Just save it under the username field

dilanifernando 2017-04-25 19:28:27

dilanifernando 2017-04-26 17:46:43
@s3613240 pushed the code on GitHub .. review needed !!

s3613240 2017-04-26 17:48:43
Already on it

s3613240 2017-04-27 13:34:13
@dilanifernando I've mentioned the changes required in the new pull request. Please push the changes

dilanifernando 2017-04-28 09:40:41
Sorry thejana, I was down with this flu , barely hold my head up .. I will do it today .. truly sorry .. I feel little better this morning

s3613240 2017-04-28 09:41:07
It's fine. We have enough time.

dilanifernando 2017-04-29 11:14:26
@s3613240 who is writing the new user stories? There has to be new user stories for new functionalities

s3613240 2017-04-29 11:14:55
I asked Lip to work on the documentation. Going to check with him now

dilanifernando 2017-04-29 11:14:56
Who's taking care of that?

dilanifernando 2017-04-29 11:15:10

s3613240 2017-04-29 11:16:38
@dilanifernando I also noticed that some of the CancelActions trigger the wrong Operations View on some occasions. Can you check?

s3613240 2017-04-29 11:17:05
Triggers BusinessOwnerOperationsView instead of

CustomerOperationsView for instance

dilanifernando 2017-04-29 12:45:58

Yeah I know , sorry I couldn't change it before .. because I had a problem with current user value .. I will change it in the next upload

dilanifernando 2017-04-29 12:48:41

I cannot upload the main database file .. I will email it to you?

dilanifernando 2017-04-29 12:49:01

I am getting an error msg

s3613240 2017-04-29 12:52:46

Okay. Email it to me. There might be merge conflicts or something. Or Slack me

dilanifernando 2017-04-29 12:53:58

Ok.. it was uploaded in to the login/registration/password reset integration branch with rest of the files

s3613240 2017-04-29 12:54:37

Okay. Will take a look at it then

s3613240 2017-04-29 23:59:51

@dilanifernando How's the progress of the Booking Functions?

dilanifernando 2017-04-30 01:14:33

Still on the go .. hopefully would be done by tomorrow .. how's yours ?

dilanifernando 2017-04-30 01:14:56

Could you push the code if ur done

dilanifernando 2017-04-30 01:16:38

If there's anything keep me updated

dilanifernando 2017-04-30 01:16:44

We have only tomorrow
